

Company: *Brompton Technologies is dedicated to the specialist design and manufacture of cutting-edge, rugged, and tour-ready LED video processing products for live events.*

Event: *LDI – Las Vegas, Nevada*

Experience: *LED processor manufacturer, Brompton Technology, is officially launching its stunning High Dynamic Range (HDR) solution at LDI 2019, and will also be giving the very first public demonstrations of a unique new technology that it believes will make a real difference to the industry, in a dedicated showcase area.*

Result: *“We are delighted to be able to bring some very exciting new technologies to LDI and let our customers judge for themselves what a difference Brompton processing can make. In our new technology showcase, we will demonstrate our latest innovation, alongside Brompton HDR that we have previously previewed at ISE and Infocomm, in addition to a wealth of other new features that these technologies enable,” says Brompton’s Managing Director Richard Mead.*
